

1d) Write a console application that places double quotation marks around each word in a string

```
using System;
using System.Collections.Generic;
using System.Linq;
using System.Text;
using System.Threading.Tasks;

namespace Prac1d
{
    class Program
    {
        static void Main(string[] args)
        {
            string str1;
            Console.WriteLine("Please Enter a sentence");
            str1 = Console.ReadLine();
            string[] words = str1.Split(' ');
            for (int i = 0; i < words.Length; i++)
            {
                Console.WriteLine("\""+words[i]+"\"");
            }
            Console.ReadLine();
        }
    }
}
```

The screenshot shows a console window titled "file:///D:/TYIT1617/Prac1/Prac1e/bin/Debug/Prac1e.EXE". The window contains the following text:

```
Please Enter a sentence
My Name is Anthony Gonsalves
"My""Name""is""Anthony""Gonsalves"
```
